

YAHYA LOULOU

FRONT-END WEB DEVELOPER

Damascus,syria | yahea.loulou@gmail.com | +963994608051

[Portfolio](#) | [GitHub](#)

PROFILE

Senior Front-End Engineer & AI Systems Developer with 4+ years of experience building high-performance web applications and leading frontend teams. Delivered 10+ enterprise-grade platforms for government entities and private sector clients across Syria, Lebanon, and Qatar, leveraging React 19, Next.js 15, and TypeScript. Recognized for expertise in animation-rich, immersive UIs using GSAP, Framer Motion, and Three.js. Recently expanded into AI engineering — built a production RAG pipeline with ChromaDB, Groq LLM, and HuggingFace embeddings. Proven ability to architect scalable component systems, mentor engineers, and align technical delivery with business objectives in fast-paced, multi-product environments.

EDUCATION

Bachelor of information technology enineering at syrian virtual university, damascus,syria

April 2019 - Present

Specialization: AI Machine Learning

EMPLOYMENT HISTORY

AI/RAG Systems Intern at [Accordev AI](#), damascus,syria

April 2026 - June 2026

- Built a production RAG pipeline for "Syria Doctors" platform using real-world data, covering the full ML lifecycle: data collection, cleaning, chunking, and embedding with Google/HuggingFace models.
- Stored and queried vector embeddings using ChromaDB, integrated Groq LLM API for fast inference, achieving low-latency AI responses.
- Delivered a full-stack AI application with a React frontend and FastAPI backend, enabling users to query doctor data via natural language.

Front-End Team Lead at [Middle East](#), Beirut,Lebanon-USA

October 2025 - April 2026

- Led a frontend team of 5 engineers across a multi-platform ecosystem (e-commerce, used-goods marketplace, video streaming, social network, digital asset trading), delivering all 5 platforms on schedule
- Architected a reusable component system in React 19 + TypeScript that reduced feature development time by ~30% and maintained consistency across platforms.
- Integrated real-time capabilities (Pusher messaging, Agora RTC video/voice calls) and client-side video processing with FFmpeg, enabling seamless multimedia experiences for 10,000+ potential users.
- Established code review standards and pull-request workflows, reducing bug escape rate by ~40% in production releases.
- Collaborated with backend, design, and product teams across 3 time zones to align technical deliverables with business milestones.

React,next js Front-End Web Developer at [One Door company](#), damascus,syria

December 2024 - September 2025

- Engineered 3+ enterprise web platforms for clients including the Syrian Ministry of Communications, achieving 90+ Google Lighthouse performance scores.
- Built a multi-language corporate website (English, Arabic, Turkish) with React 18, TypeScript, and TanStack React Query, supporting full RTL layout and server-side data fetching.

- Built and optimized the company's main website with a focus on performance, scalability, and UI consistency
- Delivered responsive, pixel-perfect UI components with Tailwind CSS and Framer Motion, reducing client design-revision cycles by ~50%.

React,next js Front-End Web Developer at [Noname company](#), Syria-Qatar

October 2023 - November 2024

- Delivered 4+ client-facing web applications with GPU-accelerated animations (GSAP ScrollTrigger, Framer Motion, Three.js 3D scenes)
- Implemented server-side rendering and static generation strategies that improved page load speed by ~45% compared to the client's prior solution.

Backend Odoo Developer at [Noptechs](#), Istanbul,Turkey

December 2022 - August 2023

- Developed and customized 10+ Odoo modules (sales, inventory, accounting) for enterprise clients, improving operational efficiency and reducing manual workflows by ~35%.
- Integrated Odoo with 5+ third-party APIs and systems, streamlining business processes and cutting manual data entry by ~60%.
- Optimized database queries and backend logic, achieving ~25% faster system response times on high-volume datasets.
- Contributed to the company's Odoo Gold Partner status through high-quality technical delivery and long-term client retention.

IT support specialist at [house of colors - Syria](#), Damascus,Syria

November 2021 - June 2022

- Maintained and supported printing systems and mobile applications for a design company, achieving 99%+ uptime on critical production hardware.
- Assisted in deploying a mobile printing services application, contributing to a 20% improvement in customer order turnaround time.

SKILLS

TECHNICAL PROFILE: React 19, Next.js 15, TypeScript, JavaScript (ES2024), HTML5, CSS3

SOFT SKILLS: Problem-Solving, Teamwork, Communication, Time Management, Adaptability, Critical Thinking, Creativity, Attention to Detail, Leadership, Continuous Learning

PROJECTS

Ministry of Communications • [Link](#)

- Engineered a full-stack admin dashboard with role-based access control (Admin, Staff, Scanner) and JWT authentication for managing ministerial appointments.
- Built an analytics dashboard tracking KPIs (meetings, visitors, completion rates) and a calendar scheduling system with time-slot management.
- Implemented English/Arabic multilingual support with dynamic RTL layout switching and file upload/download for meeting attachments.

Middle East Platform • [Link](#)

- A multi-platform web application built with React 19 and TypeScript that combines e-commerce marketplace, used-goods marketplace, video streaming, social networking, and digital asset trading. Features include: E-Commerce Marketplace.
- Built scalable product catalog with categories, variants, bundles, and stock management
- Added image optimization, lazy loading, and performance optimizations Technologies: React 19, TypeScript, Vite, React Router v7, Zustand, Axios, Framer Motion, GSAP, Tailwind CSS, Ant Design, Material-UI, i18next, Pusher, Agora RTC SDK, FFmpeg, React Leaflet, Zod, React Hook Form, Lucide Icons, Swiper, Three.js, Recharts, SweetAlert2, Emoji Picker, React Easy Crop

Astro Codez • [Link](#)

- Built a premium animated portfolio with GSAP ScrollTrigger parallax, magnetic cursor effects, 3D ambient particle scenes, and glassmorphism UI components.
- Achieved top SEO scores via React Helmet Async, JSON-LD structured data, Open Graph, and manual code-splitting with Vite.

SetAlkel Dashboard • [Link](#)

- Developed real-time order tracking and analytics dashboard
- Built scalable React application with TypeScript, Redux Toolkit, and React Query • Implemented complete product management system with CRUD operations
- Implemented protected routing and API integration layer Technologies: React 18, TypeScript, Redux Toolkit, Zustand, Tailwind CSS, Material-UI, React Query, Axios, Vite, i18next, Firebase

Ministry of Communications - Visitor Website • [Link](#)

- Implemented multi-step appointment booking system with stepper navigation (Visitor Info → Meeting Details → Date/Time → Confirmation)
- Created visitor information collection system with attendee management Developed meeting type selection (standard and special meetings) with conditional workflows

One Door Website • [Link](#)

- Created dynamic project showcase with API integration and detail pages Developed interactive team members section with pagination and featured members
- Added loading states, error handling, and skeleton loaders for better UX

SetAlkel E-Commerce website • [Link](#)

- Delivered a full e-commerce storefront supporting 6 languages (English, Arabic, French, Korean, Polish, Turkish) with RTL Arabic support for a frozen-foods company with international reach.
- Integrated Firebase Authentication, real-time notifications (FCM), and Google Maps for geographic features, supporting a dual customer/agent access model.

Car Game • [Live Demo](#)

A Car Game using one html file includes the styles and javascript codes To win the race you must reach the finish line before time runs out. 3d model for the car open world driving
